DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: Numerous powder components to be used in compositions and methods.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, a composition or method comprising two or more components is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected **(two or more specifically named components to be used in the compositions and methods)** consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

OTHER MATTERS

The examiner would also like to direct applicant's attention to a few additional matters. First, some of the claims, for instance claims 8-36, are recited as composition claims, however, they are dependant upon claim 1, which is a method claim. This procedure is generally considered improper. Second, claim 41 is recited as a use claim, which renders a claim vague and indefinite. Third, in claim 42, the claim is set forth as a method claim, and discusses a powder material according to claim 1, however, claim 1 is a method claim, not a composition claim. This claim is also confusing. Fourth, some of the method claims do not actually contain any method steps, and this would render the claim vague and indefinite.

Art Unit: 1615

Applicant is not required to amend the claims according to the above suggestions, as the claims have not been formally rejected or objected to. However, in an attempt to expedite prosecution, the examiner has made suggestions, and further invites applicant to amend the claims according to the above discussion, in conjunction with applicant's response to the election requirement.
